OFFICE FURNITURE

NEVADA
COLLECTION

NEVADA COLLECTION

A collection of office furniture with a modern design for customers who are looking for high quality. A distinguishing feature of the collection is the perfectly refined finishing touches in the form of riveted aluminum profiles and hardware elements such as corners and handles.

The NEVADA collection stylistically refers to the Flight Case technology, i.e., transport chests, which we have been producing for 15 years. They are characterized by high durability and the use of the highest quality components. The idea to make the furniture was inspired by the need to arrange the company's office referring to the manufactured chests. A unique color combination and original design of each piece of furniture of the collection result in a friendly atmosphere in the rooms so that work becomes a pleasure.

Furniture created with the use of human hands from wood-textured carpentry board: oak, beech, walnut and ash. It is possible to choose the color of staining from the template.

DO YOU NEED A PLACE TO STORE SMALL, BUT MOST NECESSARY OFFICE SUPPLIES?

Our furniture is an ideal solution because it has full-extension drawers from the renowned **Blum** brand.

OUR FURNITURE IS DELIVERED COMPLETE TO THE CUSTOMER AND THERE IS NO NEED FOR ASSEMBLY

However, in the case of racks, it is advisable to secure them firmly to the wall to increase the safety of use.

WHAT IS A CARPENTRY BOARD?

It is a layered wood material obtained by cladding the middle layer (known as the center) on both sides with veneers. Depending on the structure of the center: slatted carpentry board (the center is made of slats, e.g., glued together), paneled board (center made of planks), hollow board (made of "latticed" or freely arranged strips of veneer, plywood) used in the furniture industry.
